OVERVIEW

Tobias Bolanos International Airport is located in the central plateau of Costa Rica. Mountainous terrain is in the northwest, northeast, and southeast quadrants. Terrain surrounding the airport consists mostly of urban development. The Torres River (which is in a deep ravine) bends around the airport area to the north. To the north, an obstacle on Mt. Barva is at 9577 feet MSL within 10 NM. To the east, Irazu Volcano (which is active) rises to 11,257 feet MSL within 17 NM. To the south, a man-made structure on high terrain is at 7972 feet MSL within 6 NM. The Pacific Ocean is 36 NM to the west, while the Caribbean Sea is 59 NM to the east.

There are NO PUBLIC-USE instrument approach procedures for this airport.

Windshear and turbulence may be encountered when there are strong winds over the surrounding mountains.

Restricted Area MR(R)-3 is located within 4 NM east-southeast, Restricted Area MR(R)-2 is located 7 NM northeast, and Prohibited Area MR(P)-2 is 5 NM west of the airport.

WEATHER

Seasonal data represents average monthly values

Remarks:

Strong easterly winds may cause windshear at below 1000 feet AGL.
Strongest winds occur during January and February.
